Subject: Announcement letter for Registrations

Dear Colleagues,

This letter is to inform you that the "Foundation- Medical Research Institutes" (F-MRI[®]), chaired by **Prof. Roland Asmar**, has started the registrations in "Fundamentals in Medical Research", in collaboration with the Lebanese University.

Four years ago, F-MRI has initiated the First Medical Research Education in the Middle-East about "Fundamentals in Medical Research". So far, the F-MRI has graduated around 165 participants. Courses which involve national and international outstanding professors, will introduce future investigators to research fundamentals and related scientific, technical and regulatory requirements.

A University Diploma (UD) is proposed to students ending their degree course and to post-doctorates (physician, pharmacist, dentist, etc.).

A Clinical research Associate (CRA) certificate is also attributed to students having achieved their baccalaureate + three years (nurse, technician, biochemistry, biophysics, etc.).

Registrations will remain open until September 30th 2014 BUT Places are limited; so please, do not hesitate to contact us for any further information.

Best regards,

Mirna N. Chahine, PhD

Coordinator & Basic Medical Sciences Research Director
